Content Matrix

Change Log

Product Version: **8.7.0.7**

Date: **08/24/2018**

Maintenance Issues Resolved in 8.7.0.7

ID / LID (Legacy ID)	Content Matrix Edition	Title	Support Ticket Id
375263	SharePoint Edition	**[Feature Request]** Add additional error handling for loading lists/libraries if they contain corrupt views.	00165108
226318	SharePoint Edition	When using Distributed Migration an error is returned when certificates are deployed, if the certificate contains a space (“ “) in its name.	00151511
378053	SharePoint Edition	Migrating InfoPath Forms that contain over 5,000 entries in a single library results in the InfoPath failing to migrate with a “Exception: An error occurred during the operation of a service method: The file is not checked out” message.	00165743
379394	SharePoint Edition	Some InfoPath Forms fail to migrate with an “Unsupported Expression” error due to InfoPath template using an absolute link instead of relative link after link correction.	00166747
