# Sensitive Content Manager Enhancements

One new out-of-the-box Sensitive Content Manager Profile and several Search Terms have been added, largely targeted towards General Data Protection Regulation (GDPR) compliance.

You can now create and manage your own custom Sensitive Content Manager Profiles and Search Terms from within ControlPoint.

You can more effectively manage the Sensitive Content Manager jobs that have been submitted for content analysis. In addition to being able to filter displayed jobs by status and date range, you can also resubmit and delete jobs.

Sensitive Content Manager reports have been added that list content analysis jobs, either for a selected scope or by search term.

**Metalogix**

Scanned files by Search terms (4/1/2018 - 4/16/2018)

When an SCM job is first submitted for analysis, a job-specific ControlPoint Task Audit is generated. ControlPoint maintains Task Audit details over the life of the job.

## GDPR Dashboard

The GDPR Dashboard provides an overview of how your organization is using ControlPoint functionality (Audit Settings, Sensitive Content Manager, Governance Policies, etc.) to manage regulation-sensitive areas of your SharePoint environment.
