• The issue "Delete User Permissions does not delete SharePoint item alerts" has been resolved.	328869	00154269

7.6

FEATURES

Sensitive Content Manager Enhancements

Sensitive Content Manager (SCM) functionality in ControlPoint includes the following enhancements:

- One new out-of-the-box SCM Profile and several Search Terms have been added, largely targeted towards General Data Protection Regulation (GDPR) compliance.
- You can now create and manage your own custom SCM profiles and search terms from within ControlPoint.
- You can now more effectively manage the SCM jobs that have been submitted for content analysis. In addition to being able to filter displayed jobs by status and date range, you can also resubmit and delete jobs.
- SCM reports have been added that identify content analysis jobs either for a selected scope or by search term(s).
- When an SCM job is first submitted for analysis, a job-specific ControlPoint Task Audit is generated. ControlPoint maintains Task Audit details over the life of the job.

GDPR Dashboard

Copyright © Metalogix International GmbH 2008-2018 All rights reserved.

The GDPR Dashboard provides an overview of how your organization is using ControlPoint functionality (Audit Settings, Sensitive Content Manager, Governance Policies, etc.) to manage regulation-sensitive areas of your SharePoint environment.

Governance Policies Effective Immediately
Governance Policies now take effect immediately upon creation instead of waiting for the next run of the ControlPoint Scheduled Job Review timer job

FIXED ISSUES

	Work Item	Case No.
• The issue "Most/Least Activity Report – Least Active Sites does not List All Sites Correctly" has been resolved.	341100	00154547; 00159965; 00160860

• The issue "Cannot install ControlPoint Online in SQL Server 2014 environments" has been resolved.	317093	00149597; 00127304

7.4

New License Management UI

Management of the ControlPoint for SharePoint on premises license (which includes the tracking of SharePoint user count) can now be done from within the application interface.

Checked Out Documents Report

A new report, Checked Out Documents, lets you identify all currently checked-out documents within a selected scope, regardless of *when* they were checked out.

Sensitive Content Manager Enhancements

- When defining a ControlPoint Policy to scan items for sensitive content, you can choose a profile to use for the scan.
- Email (.eml) files are now among the file types that can be submitted to Sensitive Content Manager for scanning.

Data Analysis and Reporting Enhancements

- It is no longer necessary to run ControlPoint Discovery in order to generate Audit Log analyses. (Work Item 276998)
- For Activity analyses, a new ControlPoint Setting—Use Minimum Activity Date as Start Date—overrides the check that ControlPoint performs to ensure that you have not entered a Start Date that precedes the oldest record of activity retained in the database, resulting in faster page load times. (Work Item 287953)

Discovery Service Enhancement

The ControlPoint Setting "Web Applications to Exclude from Discovery" (WAPEXCLUDE) is now applied when the Discovery Service is used as an alternative to the standard Full Discovery. (Work Item 287056)

FIXED ISSUES

	Work Item	Case No.
• The issue [Run Now] button disappears for Copy/Move Item actions" has been resolved.	236260	00125225; 00129592; 00131105; 00138194; 00144674
• The issue "Discovery Service not saving site analytic changes in the interface after you log out then log back in" has been resolved.	290425	00143690
