

Change Log

Product Version: **8.7.0.2**

Date: **05/25/2018**

Maintenance Issues Resolved in 8.7.0.2

ID / LID (Legacy ID)	Content Matrix Edition	Title	Support Ticket Id
276805	SharePoint Edition	When migrating list/libraries with versioning enable to SPO using the Azure Pipeline the migration will throw a “SPO Migration Fatal Error” message if an Item/Document filter has been applied in the migration configuration settings.	00140388, 00149553, 00163678
302603	SharePoint Edition	Item level filtering is not being applied to lists/libraries (with no versioning enabled) when migrating to SPO using the Azure API.	00147044, 00150041
334110	SharePoint Edition	If a list/library has versioning enabled and contains a metadata column, and an older version contains metadata in that column but a now deleted user account has removed/deleted this metadata value (i.e. made it blank) in a newer version, the change in the column value is not preserved after migration.	00156896, 00158188

291342	SharePoint Edition	Filtering Items/Documents while migrating folder/document set with versioning enabled over Azure fails to migrate the items inside document set with exception "Fatal Error"	N/A
333797	SharePoint Edition	Add ability to automatically copy User Mappings into the Agent Database when users are switching between the Self Service Agent Database and the Job Database.	N/A
348892	SharePoint Edition	Add ability to refresh Job List automatically when any any jobs are added from the Self Service Workstation machine.	N/A
353271	SharePoint Edition	When Self Service is configured, users are not able to acces the "Connect" option in the Explorer view on a Workstation if a site is disconnected.	N/A
353497	SharePoint Edition	In the Job List on the Controller machine, display the Workstation machine name for where the job is created when both Distributed Migration and Self Service are configured to be used.	N/A
354423	SharePoint Edition	When Distributed Migration and Self Service are configured, migration jobs will be remain in the 'Running' status if the Certificate is not installed on the Agent machine.	N/A
359769	Core	Updated/Added pop-up dialogs for GDPR compliance messages.	N/A
